EnergyWindow[®] Achieves Three Billion Kilowatt Hours Of Energy Purchased Via Its Online Energy Procurement System

EnergyWindow also announces it has completed more than 5,000 transactions via its energy procurement system

BOULDER, Colo., Sept. 22, 2005 – EnergyWindow, Inc., a supplier of technology tools and consulting designed for purchasing and managing the energy supply used by businesses, today announced it has successfully closed requests for quotation on more than three billion kilowatt hours (kWh) of electricity energy supply via its online energy procurement system. In addition, EnergyWindow has completed more than 5,000 transactions via its energy procurement system, and serves more than 70 national customers (more than half of these are Fortune 1000 customers).

By helping its customers buy gas and electricity at more competitive prices via its online energy sourcing tool, EnergyWindow[®] has saved its customers in excess of \$30 million on more than \$240 million in energy supply costs.

“The cost of energy to power facilities is one of the top five operational costs, according to historical data we have gathered from our many Fortune 1000 customers over the past five years,” noted Dr. Jack Mason. “With energy costs continuing to rise, and heavily impact businesses, it’s more important than ever to BUY energy strategically, as well as to manage and use energy strategically.”

Mason also noted that the volume of activity and adoption of EnergyWindow’s energy procurement technology is more than doubling annually. “This is because more and more companies are understanding that a savvy energy purchase, and associated cost savings, go straight to the bottom line,” he said.

About EnergyWindow

EnergyWindow is a Boulder, Colorado-based company that offers a comprehensive suite of information-technology-based tools and energy industry expertise to help businesses manage every aspect of their energy supply cycle (natural gas and electricity). EnergyWindow offers four key areas of products and services: 1) An online energy sourcing tool for energy procurement; 2) a real-time, online energy market database; 3) an energy management information system that tracks and analyzes a company's energy usage; and 4) energy supply strategy and management consulting. The company was founded in 1999 by Dr. Jack Mason, a long-time energy industry veteran, and Dr. Mike Usrey, a veteran Internet and information technology expert. To date, the company has successfully closed more than 5,000 transactions for energy purchases, resulting in savings of more than \$30 million on \$240 million in energy supply costs. The company can be reached at: www.energywindow.com, or (303) 444-2366.
