## **EnergyWindow<sup>®</sup> Announces Significant Milestones for 2007**

### ***EnergyWindow delivers savings of 17% of energy supply cost for its national customer base***

*BOULDER, Colo., Feb. 19, 2008* – EnergyWindow, Inc., a supplier of information technology-based tools and strategic consulting services to manage the procurement and management of energy supply used by large businesses, today announced a series of significant achievements for calendar year 2007. These achievements include millions of dollars of savings for customers using EnergyWindow's PowerQuote<sup>®</sup> Web-based energy e-procurement system, an expansion of the company's roster of customers, and a continuation of a procession of successful procurement events in virtually every competitive energy market in the United States and Canada.

In addition, EnergyWindow has completed more than 10,000 transactions via its energy e-procurement system, and its customers have purchased more than 11 billion cubic feet of natural gas supply and 8 billion kilowatt hours of electricity via this system.

"Not only have we been able to provide extraordinary value in terms of process efficiency and savings for our end-users, but we've also successfully concluded a number of auctions for the purchase of renewable energy, and renewable energy certificates (RECs)," said Chris Wiederspahn, Vice President of Market Intelligence.

But it's not just auction numbers that separate EnergyWindow from other, more transactional players, according to Wiederspahn. EnergyWindow offers a broad range of support services and has emerged as a leading provider of strategic procurement and market intelligence upon which energy buyers have come to rely. Evidence of EnergyWindow's industry leadership can be found in such activities as playing a key role in the development of a new standard retail energy contract with the North American Energy Standards Board (NAESB) that now is available for use and gaining popularity, and hosting a web site that offers a wide array of information to serve energy buyers including a knowledge base of competitive market information and a variety of white papers that analyze current energy trends and

provide recommendations on how buyers can capitalize on shifts in energy markets by adopting new purchasing strategies.

## **About EnergyWindow**

EnergyWindow is a Boulder, Colorado-based company that offers a comprehensive suite of information technology-based tools and strategic energy consulting to help businesses manage every aspect of their energy supply cycle (natural gas and electricity). EnergyWindow offers five key areas of products and services: 1) PowerQuote<sup>®</sup> – an online sourcing tool for energy procurement; 2) PowerScape<sup>®</sup> – a real-time, online energy market knowledgebase; 3) PowerTrac<sup>®</sup> – an energy management information system that tracks and analyzes a company's energy contracts; 4) PowerStrategy<sup>®</sup> – a proprietary, consulting-based planning process for energy supply strategy and management; and 5) PowerProjector<sup>™</sup> – an energy cost projection and value-at-risk analysis tool. The company was founded in 1999 by Dr. Jack Mason, a long-time energy industry veteran. To date, EnergyWindow has successfully closed more than 10,000 transactions for energy purchases, resulting in savings of more than \$138 million on \$816 million in energy supply costs. The company can be reached at: [www.energywindow.com](http://www.energywindow.com), or (303) 444-2366.
