EnergyWindow[®] Exceeds Two Billion Kilowatt Hours of Energy Purchased Via its Online Energy Procurement System

EnergyWindow also announces it has saved its customers \$24 million based on \$145 in energy supply costs, to date

BOULDER, Colo., Feb.28, 2005 – EnergyWindow[®], Inc., a supplier of technology tools and consulting designed for purchasing and managing the energy supply used by businesses, today announced it has successfully closed requests for quotation on more than two billion kilowatt hours (kWh) of electricity energy supply via its online energy procurement system. EnergyWindow also announced it has saved its customers in excess of \$24 million on more than \$145 million in energy supply costs, by helping them buy gas and electricity at more competitive prices via its online energy sourcing tool.

“No question, EnergyWindow is the commercial energy users’ ally and the leader in online energy transactions for private companies,” said Dr. Jack Mason, co-founder and president of EnergyWindow, Inc.

“As energy prices continue to escalate and margins in various industries run even tighter, a savvy energy purchase can often, and quite literally, mean the difference between a profit and a loss,” continued Mason.

According to Mason, the use of EnergyWindow’s online energy sourcing tool allows companies to reduce the cost, risk and complexity of procuring energy at competitive prices. “All too often, companies default to the highest-priced supplier of gas and electricity because they don’t have the time, expertise or information needed to prepare a request for quotation for competitive energy contracts. The EnergyWindow online energy sourcing tool makes it fast and easy for companies to pursue competitive energy bids they otherwise would not pursue.”

For competitive reasons, EnergyWindow's nationally recognized customers decline to offer specific cost savings data. However, a sampling of EnergyWindow's customer base includes:

Food Lion

Hyatt Hotels Corporation

Johns Manville

Kmart

Loews Cineplex Entertainment Corp.

PepBoys

Regal Entertainment Group

About EnergyWindow

EnergyWindow is a Boulder, Colo.-based company that offers a comprehensive suite of information-technology-based tools and energy industry expertise to help businesses manage every aspect of their energy supply cycle (natural gas and electricity). EnergyWindow offers four key areas of products and services: 1) An online energy sourcing tool for energy procurement; 2) a real-time, online energy market database; 3) an energy management information system that tracks and analyzes a company's energy usage; and 4) energy supply strategy and management consulting. The company was founded in 1999 by Dr. Jack Mason, a long-time energy industry veteran, and Dr. Mike Usrey, a veteran Internet and information technology expert. To date, the company has successfully closed more than 2,500 transactions for energy purchases, resulting in savings of more than \$24 million on \$145 million in energy supply costs. The company can be reached at: www.energywindow.com, or (303) 444-2366.
