JCPenney Recognizes EnergyWindow[®] as “Supplier of the Year”

EnergyWindow earns accolades for its energy strategy and energy procurement services

BOULDER, Colo., July 30, 2008 – EnergyWindow, Inc., a supplier of information technology-based tools and strategic consulting services for the procurement and management of energy supply used by large businesses, today announced it has been awarded the 2008 JCPenney Procurement Supplier Award.

EnergyWindow received this award for its key role in helping JCPenney to develop a comprehensive energy sourcing strategy. In working with EnergyWindow during 2007 alone, JCPenney was successful in completing 33 electric and natural gas sourcing projects, with 15 different energy suppliers, thus assisting JCPenney in mitigating the cost of natural gas and electricity needed to operate its facilities.

“EnergyWindow specializes in helping large energy users develop energy procurement strategies that are designed both to hold the line on, or reduce, escalating energy costs, as well as minimize the risk of volatile energy pricing that can negatively affect a company’s bottom line,” said Dr. Jack Mason, president and founder of EnergyWindow, Inc. “We’re honored to receive the award. Even more important, we are honored to have worked closely with JCPenney to help them develop a strategic energy procurement program that is designed to minimize risk and energy costs.”

About EnergyWindow

EnergyWindow is a Boulder, Colorado–based company that offers a comprehensive suite of information technology–based tools and strategic energy consulting to help businesses manage every aspect of their energy supply cycle (natural gas and electricity). EnergyWindow offers five key areas of products and services: 1) PowerQuote[®] – an online sourcing tool for energy procurement; 2) PowerScope[®] – a real-time, online energy market knowledgebase; 3) PowerTrac[®] – an energy management information system that tracks and analyzes a company’s energy contracts; 4) PowerStrategy[®] – a proprietary, consulting-based planning process for energy supply strategy and management; and 5) PowerProjector[™] – an energy cost projection and value-at-risk analysis tool. The company was founded in 1999 by Dr. Jack Mason, a long-time energy industry veteran. More information about the company can be found at www.energywindow.com.

EnergyWindow, PowerQuote, PowerScope, PowerTrac, PowerStrategy, and PowerProjector are registered trademarks of EnergyWindow, Inc.
